At Graypants, we are a team of problem solvers. We design products, architecture, and bold installations with a focus on imagination, natural materials, and quality craftsmanship. Through beautiful and practical design, we strive to elevate the world around us in ways that can be appreciated for a lifetime. Anchored in Seattle and Amsterdam, our work spans the globe, including collaborations and custom designs for leading companies worldwide, transforming spaces with light.

**Dream big.
Scribble often.
Make thoughtfully.**

Wick is a call from our past to the future; it's the opportunity to mindfully light the present.

Creating a place to gather, Wick is designed to be a companion, to join in adventures and create togetherness and ambiance everywhere. We no longer rely on candles to keep us out of the dark, but candlelight has always filled our lives, setting the stage for warm dinners and intimate evenings.

Wick

Wick

Wick is designed with the belief that light is meant to be shared. As a portable LED table lamp, Wick is candlelight for the modern era - safe, versatile, and classic.

Activate Wick using a touch sensor, and toggle between four brightness settings including a gentle, flickering candle mode. Depending on the brightness setting, Wick stays lit from 7 to 70 hours.

Combining the romance of a candle with the utility of a flashlight, Wick is at home in a variety of contexts, from your bedside table and backyard patio, to restaurants and event spaces.

Wick Pro

As an extension of the Wick family, Wick Pro makes it easy to display multiple Wicks together. With the same profile as Wick Classic, Pro offers wireless charging, IP65 water resistance, and remote capabilities. The Pro line includes accessories that seamlessly enhance Wick’s functionality and premium user experience.

The new collection features a single wireless charger, a multi-charging tray for up to eight Wicks, and a custom-designed remote control. The handheld remote links an unlimited number of Wicks together, extending the functionality of its familiar touch control to your pocket.

Barro

In an exploration of new materials and mediums, Graypants launches Barro, a pendant lamp designed by Caterina Moretti and made in Oaxaca, Mexico.

The partnership between Graypants and Caterina was born of their friendship, kindred design spirit, and a curiosity to explore working with wholly natural materials; Barro is made from clay pulled directly from the earth of Oaxaca, handcrafted and finished with only the power of heat and smoke.

A clay pendant and a hand-blown glass shade are a stunning marriage of natural materials and the result is a handmade piece of art.

Barro is created using an ancient, region-specific process. It begins with gathering earth from the surrounding areas of Oaxaca to make the clay. Water is added to slake the clay and create slip, which is then poured into handmade plaster molds. The clay pieces are each hand burnished before firing with the help of a river stone, to achieve an iridescent color and smooth feel.

Once the pieces are ready to be fired, they are placed in a special two-vent kiln and stoked continuously for nine hours. The Natural Clay finish is then complete and removed from the kiln. For the Charcoal Clay finish, a process known as reduction of atmosphere takes place: during firing, at a specific moment, the vents are closed to reduce oxygen, generating a chemical reaction that infuses a deep black color in the clay. The clay technique dates back to pre-Hispanic times in Mexico and tells the story of the empirical knowledge of those who came before, and their journey exploring and communicating with nature.

To highlight the ceramic element and the markings made by the fire in it, we added a blown glass dome that envelops and protects it in a symbolic and metaphoric manner, as a display case of sorts, exhibiting the treasures within it.

Barro Pendant

Barro is an artisanal pendant composed of two unique statement pieces. The first is a transparent, hand-blown glass shade embracing the warm, burnished natural clay texture of the handmade hub. The second combines the smoked glass shade with a Oaxacan barro negro finished pendant, subtly bringing to the foreground the traditional burnishing work producing a textured charcoal tone through the additional reduction firing process.

The Barro pendant lamps represent the conjunction of craft and innovation, using traditional techniques to create a modern, unique shape. Incredibly versatile, Barro integrates easily to elevate its surroundings - over a dining table or kitchen island, dotted over a bar in a restaurant or welcoming you in a lobby space.

Scraplights

Linear
Series

Classic
Series

Frame
Series

It all started with Scraplights

Sourcing post-consumer recycled cardboard and turning it into warm, diffused light. Scraplights have become our signature series, one we continue to love and evolve. Scraplights are

sustainable fixtures with a versatile aesthetic that elevates both residential and commercial spaces alike. Our series includes table lights, pendants, sconces, and a linear fixture.

Depending on the finish, each piece of a Scraplights fixture is precision-cut with a laser or knife - Natural and Blonde welcome the subtle patina of the edge burn from the laser, while the White finish requires the use of a knife to achieve the pristine, white edges. Scraplights are then assembled by hand using nontoxic adhesive and treated with a non-toxic fire retardant. Tough and elegant, Scraplights provide warm, intimate, and functional lighting.

Design in the end is really about people.

Our products are an extension of the people, the faces and the stories behind them. Graypants invests in innovative ideas that help create meaningful jobs. We believe our products have stories that transcend their designs. The stories are about the process and the people who take great pride in the quality of their work that goes into crafting and assembling each and every one of our light fixtures. Handmade in our Seattle studio, Scraplights have become our signature

series - one we continue to love and evolve. We have since expanded into Europe, with an office in Amsterdam, and a team of makers in partnership with a social works program to provide craft-based work for those who need it most. Using local production gives Graypants the opportunity to provide meaningful work for communities - a great example of the brand's belief in responsible design, responsible materials and responsible production.

Scraplights

Linear Series

Scraplight Linear creates a warm, ambient glow. Available exclusively in a 4-foot length and offering direct light, it comes in three distinct form factors —Disc, Drop, and Olive— creating versatile and elegant design applications.

Hewn

Hewn is a versatile architectural lighting fixture designed for spec-grade performance and general illumination. We offer flexible configurations with direct, indirect, and combination options, an efficient Batwing optic for uniform indirect light, and up to 1500 lumens per foot. Available in two lengths, three height options, and single or dual circuit configurations, Hewn adapts beautifully to various workplace needs.

Chrona

Dish Pendant

Table Lamp

Sconce

Mimicking the phosphorescent envelope found around stars, Chrona creates a warm, atmospheric glow.

Chrona fixtures are warm, modern expressions, harnessing a charm that is both timeless and futuristic. Spun brass comes together sandwiching an acrylic diffuser that traces the silhouette of each fixture, providing even diffusion of the integrated LED light source. Chrona is available in both horizontally or vertically oriented pendants, and also as a sconce or table lamp. With a variety of sizes and configurations, Chrona can be clustered together to make constellations or stand out alone.

Pendant

Much like staring into the night sky, Chrona dish pendants hang freely, allowing the user to experience the natural refraction and twinkling of light coming from subtle movement and playing off the beautifully finished brass.

Slim and robust, the pendants are available in diameters ranging from 6 to 17 inches. Offered in both horizontal and vertical orientations, Chrona dish pendants can combine to create stunning constellation-inspired clusters, or can be individually hung to accentuate an area.

Pendant

Linear

Sconce

Roest reflects unpretentious simplicity, and the unique finish on every single piece is what makes this collection truly special.

In their first outside collaboration, Graypants teamed up with Dutch designer VanJoost to expand on their curiosities and learn the craft of another designer.

In VanJoost's native language, roest means rust, and this highly textured series shows the natural relationship between the elements, time, oxygen, and iron. Roest highlights Graypants unique fascination with nature and material research.

Roest is made from naturally rusted and zinc-coated steel, and powered by an LED bulb. A minimal black cord connects to a black powder coated canopy. Bringing textures we usually experience in nature to the interior environment. Roest makes the industrial delicate, and lends warmth to a sleek modern form. To achieve the desired patina, each piece is finished by hand, and no two are alike. VanJoost starts with raw, steel pipes and rinses them in a vinegar bath

which seeps into the pores of the metal creating a hardy and pitted surface - this helps the subsequent rusting process set in, in a deeper way. Each piece is then treated with a solution that starts a chemical reaction accelerating the effects of how elements would impact steel over time - a process that would otherwise take more than six months. Designed by VanJoost and hand-made in Holland, Roest presents natural colors that elevate any setting.

Drum

Pendant

Sconce

Finding the line between the strength and flexibility of wood, Kerf harnesses a texture that feels natural, but was created with technological precision.

Handmade in our Seattle studio, the shade panels are swappable and reversible, allowing for change over their long lives.

Kerf is made with FSC-certified, high-quality plywood, wrapped around durable powder-coated steel wire frames, providing a distinct shape. Kerf is available as a pendant and sconce, and performs well in commercial spaces, offices, and homes.

Canopy

Using a canopy allows us to create sculptural compositions in which pendants interact as a cohesive whole rather than using singular lit elements. Our canopies are powder-coated aluminum enclosures that conceal power cords and offer a clean visual aesthetic. All cords are pre-measured and wired in our Seattle studio to limit onsite installation time.

Whether it is a cascading array of Roest pendants or a large grouping of Scraplights Moons in various dimensions, canopy clusters have a dramatic visual impact. Incredibly versatile, canopies can be surface-mounted to ceilings or suspended in multiples to cover large areas.

We enjoy working closely with our designers and customers to create something that will be appreciated for a lifetime. Whether its a striking statement in your dining room or a dynamic cluster in a commercial staircase, the possibilities and expressions are limitless.

Murmurations

Flock92

Murmurations utilize uniform pendants in fixed positions, but their relationships within the group creates an experience of complex movement.

Flock72

Flock24

Flock72

Flock60

Flock30

Murmurations are custom installations inspired by the breathtaking natural phenomenon of Flocking and the incredible sight of thousands of starlings flying together in unison. Flocking is considered an emergent behavior arising from simple rules that are followed by individuals without any central coordination. By following our own simple design rules,

we can create dynamic light installations comprising of rotationally unique cardboard pendants. A Murmurations fixture is a versatile and spectacular LED chandelier with endless customization possibilities, from just a few to hundreds of pendants, installations can be customized to fit your specifications and make a grand impression of any space.

Prop Ceiling System

Prop Ceiling System

The Prop panel is a perforated steel unit designed for versatile ceiling configurations. Its key advantage is its ability to be endlessly combined to create a Prop Ceiling System, supporting integrated lighting and acoustical requirements. Each panel features a central triangular hole, allowing most sprinkler heads to pass through. Additionally, two optional inserts are available: a slim LED panel tailored to fit within a Prop and an acoustic PET felt insert that reduces ambient noise.

Prop Ceiling System

Custom Projects

Custom installations represent the intersection of imagination and specificity, allowing for something truly unique and awe-inspiring, that is also created with intention for the surrounding space and the users who will share the experience.
